

# Watching YouTube Videos in the Classroom

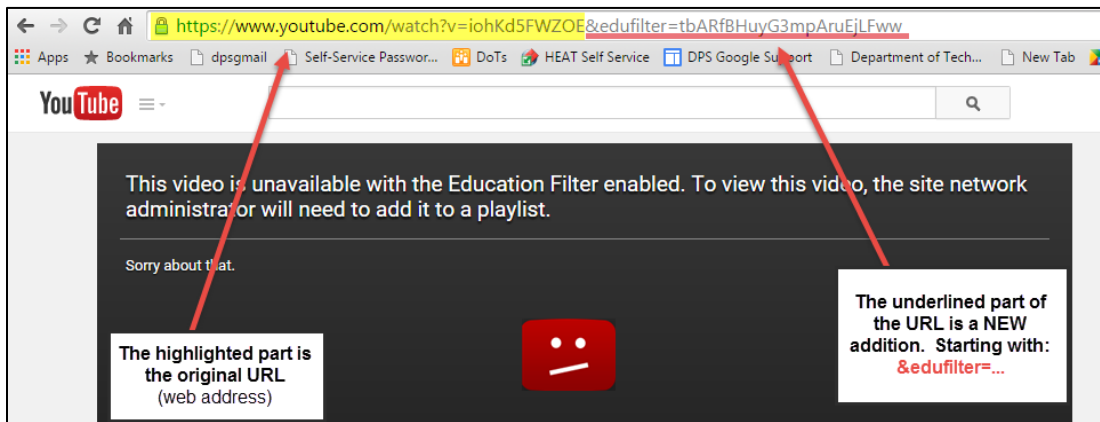

## Troubleshooting: when Education Videos won't play

*\*The example below was done without logging into the DPS Internet User Override*

1. Find the video you want to play in your classroom

2. When you click on the link, you will most likely get this screen (whether you are logged in with user override to internet filter or not):

3. Delete the part that was newly added to the URL (you may have to look at the original link to see what to delete. In this example it changes

from: <https://www.youtube.com/watch?v=iohKd5FWZOE&edufilter=tbARfBHuyG3mpAruEjLFww>

to: <https://www.youtube.com/watch?v=iohKd5FWZOE>

4. The educational video will now play on YouTube. Note, on some videos, you may still have to login to the Internet Filter for the video to work.
